The Old and New Anti-Option Bills. Mr. Hatch's anti-option bill, now pending in Congress, is the same in its main fea tures as the bill to which Senator George and others devoted so much time in the last Congress. But these persons labo under a misapprehension. The two bills way, let us add that the fact that there is a radical difference between the bil last Congress and the bill pending in the present Congress ought to serve to remind our law-makers not to be too confident that the bill now under consideration is a perfect one. There is much to be said for and against the new

Hatch bill.

Mr. Hatch explained the other day that the difference between one feature of the old bill and a feature of the new bi which was by some persons supposed to be the same in substance as the old bill was that any non-owner, any citizen of the United States, who desires to buy and seil commodities for future deliver shall have the right to do so-that b we take it, any of the commodities name in the Hatch bill. The bill of the Fiftysecond Congress restricted the sale to owners or those who had acquired from owners the right to sell. Under the present bill, all that is asked of any man who goes upon a board of trade and offers 500 or 1,000 bales of cotton or 1.000.000 bushels of wheat, to be delivere in the future, is not that he shall b modity at the time he makes the said that he shall have acquired the righ ated he shall actually deliver it od faith the wheat or cotton that h delivery, at the option of the seller, under the rules of the board of trade where the contract is made. This, therefore, is a very different bill from the one who was so strenuously pressed upon the at tention of the Fifty-second Congress.

Mr. Cox. of Tennessee, put a questic wer to the satisfaction of the former dities was to be made would have the right to release the seller from his oblior rendered worthless in that manner would be to destroy totally the value of Hatch's evasive answer was that no man in the United States has any right to go upon the boards of trade and consummate it be is going to destroy the value of the property of the people Any member of the House of Representa whether he favors the Hatch bill or i opposed to it. The answer begged the question. It is a disputed point whether these sales for future delivery destroy anybody's property.

The Fire Department.

The changes made in our Fire Depart ment to go into effect on the 1st of July are for the public good. They mean that at all the principal engine-houses there will be at hand hereafter a full force to man the apparatus and handle the hose, whenever an alarm comes in. Under the present system it has sometimes hap pened that an engine got to a fire and up before a stream could be handled as was desirable that it should be handled. The changes that have been made are such as experience has pointed out as necessary, and are on a line with the plan of organization which prevails in other cities of our grade.

To effect these changes-to add to the number of station-men-our Board of Fire Commissioners had to drop a few men from the rolls and reduce the pay of many others, so as to work along with out increasing the cost of the department The pay of the Chief was reduced. He would not have it any other way. And it is much to his credit that he insisted on sharing the fate of his officers and men, whose pay was reduced.

Richmond has always had a good fire department, but now we believe that it will be better than ever. There will hereafter be many more firemen early at fires than before, and everybody knows that at a fire more than in almost any other emergency it is "prompt action

which is decisive of good results. The board is to be commended for its reorganization of the department. It has been long foreseen by many observant persons that reorganization was inevitable, and probably no more favorable time than this could have been chosen

Our fire board is composed of gentlemen who are well known in the community; who serve without pay, and give a grea deal of time and attention to the service. Their action in this matter seems wise. At any rate, the new system is very well worth trying. We know of no city of our size which has tried it which has gone back to the system now in vogue ere, and which requires only a certain portion of each company to be continually present at the engine-house.

Mr. Hill's Speech.

Mr. Hurs speech in the United States Senate on Thursday was not such a one as we could wish he had made. It was too strongly tainted with anti-Clevelandism to be accepted as the speech which he would have delivered if Mr. Cleveland had not been for him a Mordecat sitting at the king's gate. There was, too, a flavor of the New York Sun in his argu-

Hill's speech will not contribute aught to his popularity. However, it must be owned that in the running debate he proved himself to be a senator worthy to represent New York so far as natural talents and acquired qualifications are concerned. The income-tax will be levied, or else there will be no tariff bill passed Mr. Hill cannot control a single vote in

Wytheville on August 15th. It may be that here and there in this State the Republicans will leave a few districts to the Populists, so that the contests may be between the Democrats and the Populists, but wherever a lively imagination or hopeful dispositon suggests a chance to beat the Democrats the Republicans will take that chance for the meetings. He was highly was elected its treasurer. He was highly

against the Democrats during this campaign. He will be the leader of the Republicans and the chief ally of the Popu-Card of rates for more space furnished

The fact that there is to be a Republican Richmond by Mr. C. C. Clarke, formerly of the Whig, is also significant. It shows very plainly that the Republicans, so far from not making a fight in this State this fall, are determined to be on hand and take every possible advantage of Deme cratic apathy or dissensions. This our people ought to see. This they must see as the canvass advances.

There are too many senators who want o "set themselves right" on the tariff by indulging in long, prosy speeches. The way for them to "set themselv right" is to vote right and adjourn. Their speeches will never be read, but their votes will be scanned over and often,

Albert Lane was taxed a similar amount for assaulting Clarence B. Baker.
The other cases were unimportant.

First New Wheat.

The first new wheat of the season was offered on 'Change yesterday morning by Mr. P. C. Edwards. The sample offerer represented 100 bushels longberry wheat grown on the farm of Henry Bell, Esq. of King William county, and the consignment was sold to the Gallego Mills for 62 cents per bushel. The sample show was of fine quality and condition, and would indicate that the Virginia crop this year is fully up to, if not above, the average. This offering was five day earlier than last season, but the selling price was 5 cents per bushel less.

Charles F. Pidgin, Whose Popular Airs Are pany (now the Southern Railway Company), died quite suddenly at his home in Washington yesterday morning. He had long been in ill health, but was able to be at his office and attend to his duties, and was at work the day before his death. Mr. Hall came to Richmond shortly after the war, and embarked in the notion business as a member of the firm of Hall & Hutcheson. After about five years he retired from this enterprise, disposing of his interest to Mr. J. P. Yancey. He then entered the service of W. J. Johnson, with whom he remained for ten or twelve years. During the latter part of his service with that firm he was located in Charlotte, N. C., in charge of a branch establishment.
